Military

Description of military construction at VINICNE, near PEZINOK1. General background and purpose

a) An army installation has been under construction South of VINICNE (formerly SVAJNSBACH) since 1958 and was still in progress in early summer 1962. In addition to army personnel, prisoners were also employed on the building work, and were brought to the site daily. The installation has been under army guard since about 1960.

b) Various opinions are current in the vicinity about the purpose of the construction and some local inhabitants think it is a new airfield, as it is a flat surface with a great deal of concrete work; rumours of a rocket base have also been heard.

c) No connection has been remarked between the new installation and the artillery garrison occupying modern barracks on the Northern outskirts of PEZINOK.

2. Location (see sketch)

The installation is about 4 km. South-east of PEZINOK, extending along the East side of the PEZINOK - VINICNE - SENEC road, with its Northern side touching the Southern outskirts of VINICNE and extending alongside the VINICNE - SENKVICE road, which was repaired by army personnel in spring 1962. The South-east side meets a wood which stretches up to the road. The area is about 1 km. wide and is enclosed by Senkvice woods.

3. Layout (see sketch)

- 1) Wire fence round the whole area
- 2) Main entrance from the PEZINOK - SENEC road, South of VINICNE
- 3) Guard post, with army guards always on duty, a masonry building about 25 x 10 m., North of (2)
- 4) Asphalt road from the main gate, forking into two.
- 5) Small masonry single storey building
- 6) Long factory hall type building, about 150-200 m. long, extending along the North side
- 7) Ferro-concrete bunker on the edge of the wood
- 8) More concrete work, South-east alongside the wood
- 9) Steel tower, with bushes round it, to conceal it from view, at the end of the asphalt road which runs South-east
- 10) VINICNE-SENKVICE road, up to 1962 only a cart track, but put in order by army personnel early
